§ 01 SUMMARY

In *brief*.

Polyglot AI engineer and founder. I'm Core AI Engineer at Keemakr AI (keemakr.ai), building an agent platform and marketplace — agent runtime, SDK, and the capability layer that lets third-party agents safely reach tenant memory, knowledge bases, and connections. Also cofounder at Vena (heyvena.com), a coin-sized health sensor that hides behind the analog watch you already wear. Previously I architected production trading infrastructure at WhiteBeard AI (Rust microservices, C++ MT5 plugins, NATS, Datadog) and was founding engineer at Elcara (multi-agent orchestration, real-time market intelligence, content engines). Comfortable shipping in **Rust, C++, Go, TypeScript, Python & Solidity**. Previously: 12 hackathon wins and a \$5K Arweave grant.

§ 02 EXPERIENCE

Where I've *shipped*.

PRIMARY

AUG 2026 –
PRESENT
REMOTE · IST

Keemakr *AI*

CORE AI ENGINEER

- **Core AI Engineer** on an agent platform and marketplace: production AI agents that install into tenant workspaces as @mentionable departments.
- Building the **agent runtime and SDK** (TypeScript): tools, channels, sandboxed execution, and the operator that dispatches work across a bench of agents.
- Designing the **capability layer**: consent-gated, scoped grants that let third-party agents access tenant memory, knowledge bases, records, and connections — with usage metering.
- Owning the **marketplace entry pipeline** third-party developers build against: entry manifests, dependency wiring, and install flows that seed departments into a tenant.

PAST

APR 2025 – AUG
2026
REMOTE · IST

WhiteBeard *AI*

SYSTEMS ENGINEER

- Architected **end-to-end trading infrastructure** for AI-driven risk management at financial institutions.
- Owned the stack: **C++ MT5 server plugins**, **Rust microservices** (order ingestor, log ingestor, relay servers, analytics routine), and TypeScript orchestration backends.
- Built the **Quantum Control Plane**: a Rust-based unified orchestration layer overseeing terminal registration, order routing, and log ingestion across the ecosystem.
- Shipped the **Nova market maker** (C++) and the **Abby trading platform** (Next.js + Rust relay servers) integrating with MT5 plugins.
- Implemented onchain invoicing routines for billing and revenue distribution (Ethers.js + Prisma + AMQP).
- Stack glue: **NATS messaging**, **Datadog observability**, AWS Secrets Manager, PostgreSQL.

FOUNDER
JAN 2026 –
PRESENT
HEYVENA.COM

Vena.

COFOUNDER

- **Cofounder** of a coin-sized health sensor that hides behind the analog watch you already wear. **No new device, no new wrist habit.**
- PPG-based sensing (MAX86141-class front-end, 100 Hz) for **heart rate, SpO₂, HRV, sleep and skin temperature**, streamed to a phone over BLE.
- Shipped the **brand identity** and a cinematic **3D waitlist site** (Next.js + React Three Fiber) with a scroll-driven product film.
- Driving **hardware R&D**: industrial design, layer architecture, and proof-of-concept validation of wrist-back optical sensing.

PAST

SEPT 2025 – JUN
2026
REMOTE • IST

Elcara.

FOUNDING ENGINEER

- **Founding engineer** across 30+ repositories, building the company's core agentic AI infrastructure from zero.
- Built **Juriga AI**: a multi-agent platform for legal document analysis with shared context pipelines, auth, and streaming responses.
- Shipped **Resolved Markets**: real-time orderbook tracking and market intelligence (TypeScript + WebSocket).
- Built the **Email Engine** (Next.js 14, Postgres, Prisma) and **Viral Pipeline** for AI-powered content generation.
- Shipped **Poly Ranker**: a Polymarket wallet scoring system (Python, FastAPI, Redis).
- Multi-agent orchestration system, browser extensions (Clerk + Supabase auth), pSEO infrastructure.

§ 03 SELECTED
PROJECTS

Out in the *wild*.

WHITEBEARD

Quantum *Control Plane*

Unified orchestration layer overseeing the entire WhiteBeard trading ecosystem.

Rust • NATS • PostgreSQL

WHITEBEARD

Nova *Market Maker*

Proprietary high-frequency market making software with MT5 plugin integration.

C++ • MT5 • Low-latency

ELCARA

Juriga *AI*

Multi-agent legal AI platform with shared context pipelines and streaming responses.

TypeScript • Next.js • OpenAI

ELCARA

Resolved *Markets*

Real-time orderbook tracking and high-fidelity market intelligence platform.

TypeScript • WebSocket • Real-time

WHITEBEARD

Abby *Platform*

Client-facing trading platform with relay server integration for Pawn AI.

TypeScript • Next.js • Rust

INDEPENDENT

Dejavu *Robot Safety*

Robot imagines three futures in a world model, decodes them with a PoseNet I trained ($r = 0.999$), and lets Claude judge — fails closed. Solo, 36 hours, hackathon winner.

PyTorch • LingBot World 2 • Claude

INDEPENDENT

tracekit *Traces* → *Model*

Mines your coding-agent session logs and QLoRA-tunes a 0.5B model that handles ~31% of edit calls offline; falls through to a frontier API otherwise.

Python · QLoRA · Local inference

ELCARA

Poly *Ranker*

Polymarket wallet scoring system with token holder analysis and ranking.

Python · FastAPI · Redis

INDEPENDENT

nani *Scam.Honeypot*

Gemini Live voice agent that answers scam calls as an elder, extracts a live dossier of the scam, and drafts the cybercrime complaint. Google DeepMind Bangalore Hackathon.

Gemini Live · Twilio · TypeScript

§ 04 SKILLS

What's *loaded*.

LANGUAGES

Rust · TypeScript · Go · C++ · Python · Solidity · Node.js

FRAMEWORKS

Next.js · React · Express · Fastify · Prisma · Ethers.js · Anchor · FastAPI

DATA & MESSAGING

PostgreSQL · Redis · MongoDB · Supabase · NATS · AMQP · WebSocket

INFRASTRUCTURE

Docker · Kubernetes · AWS · Datadog · CI/CD · Linux

ONCHAIN

DeFi protocols · Solidity · Arweave · Stellar · Cronos

§ 05

ACHIEVEMENTS

The *trophy shelf*.

AUG 2026

Winner — launchd Hackathon (Dejavu)

INCEPTION HACKATHON 2.0 · LAUNCHD

JUN 2025

Core Dev Recognition — Ecosystem Launch

WHITEBEARD TRADING

OCT 2024

\$5,000 Grant — India Launchpad

ARWEAVE

APR 2024

\$2,000 Bounty — Illuminati Hackathon

ITM UNIVERSITY

FEB 2025

First Place — ITM Hackathon

ITM UNIVERSITY

MAY 2024

Second Place — Stellar Indiathon

STELLAR NETWORKS
